

# Janet The Politician Is Just A Woman

NEW FASHIONS

(BY ROSE SOBERS)

It was feared that women would never have the stamina to do political work. But I feel this fear unjustified after meeting the Hon. Mrs. Janet Jagan. She has convincingly shown herself to be a tireless political worker. She is the first woman to hold a Ministerial post on the government and is hailed by other women as an exceptional credit to her sex.

## She Likes Drop Earrings, 'Pony Tail' Hair Style White Roses and Dancing

She went to all lengths in her effort to prove herself the equal of man—and feels nice about it.

She goes down into history as the first woman Minister of Labour, Health and Housing in this colony and the only woman in the Legislative Council.

### NO DRUDGERY

Janet is pretty and popular, and has a spacious home, and a nice little family of four, including herself. She also has a full-time maid. Thus freed of much of a housewife's drudgery, she has a unique opportunity to work for her community—and I know she will do it.

Born in Chicago, she attended Primary and Secondary schools. Like every other child she played games, and did a lot of swimming, which is responsible for her very good figure. She later entered a Nursing College.

together. Janet plans to give her Children a good sound education.

### WHITE ROSES

She loves flowers a great deal.

"I welcome a vase of white roses", she says. "Addresses are plain and simple and of many shades."

She wears her hair in the "Pony Tail" because that suits her best of all. She was encouraged time and time again to have it cut, but she just likes it that way. Drop-earrings are what she likes best in jewellery..

Her hobbies are swimming, reading and dancing. When she was in Chicago she did a lot of skating, fencing and archery.

Says she: "I am so much occupied with outside work now, that I hardly find time for anything else."
